# ABOUT AL KASHEF

---

Al-Kashef Al-Sareea was established in 2004 as a leading Jordanian institution specializing in security and protection. From the outset, our vision has revolved around delivering high-quality security solutions that provide peace of mind to our clients and safeguard their properties and assets. Over the years, our services have expanded to cover most governorates of the Hashemite Kingdom of Jordan, solidifying our position as a trusted security partner.

We specialize in providing integrated security solutions. Our focus is on offering the best solutions to protect our clients, emphasizing the highest standards of quality and precision in all our services.

Our exceptional team, equipped with deep knowledge and extensive experience, is dedicated to delivering reliable and comprehensive services that meet the growing needs of the market. We believe that security solutions are not merely about devices but are a cornerstone for building trust and providing the safety every client deserves.

We are passionate about enhancing our customers' experience by offering tailored services and keeping pace with the latest technological advancements. We continuously strive to improve our offerings and expand our operations. Our goal is to be the first choice for anyone seeking to protect their assets and ensure their safety against intruders or thieves while maintaining the highest security standards.

# OUR VISION

---

## VISION

To establish ourselves as the foremost provider of security solutions in Jordan, redefining the standards of safety and trust through innovative technologies and exceptional service. We aspire to protect lives and assets with precision and efficiency, becoming a trusted partner in building secure environments for individuals, businesses, and communities.

By constantly evolving with industry advancements and maintaining a client-centric approach, we aim to create a future where peace of mind is accessible to all, ensuring sustainable growth and long-term relationships with our customers

# OUR MISSION

## MISSION

To deliver exceptional security and protection solutions tailored to the unique needs of our clients, utilizing advanced technologies and adhering to the highest standards of quality, reliability, and efficiency.

We are committed to safeguarding lives, properties, and businesses by providing innovative, responsive, and cost-effective services. Our mission is to build lasting trust with our clients, fostering a safer environment while continuously enhancing our expertise and expanding our reach to meet the ever-growing security demands

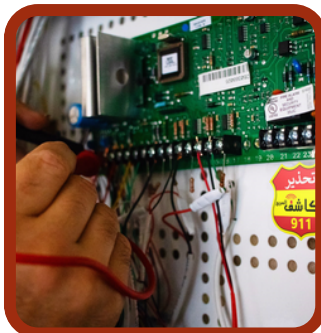

## (SMART DETECTOR)

An end-to-end solution for burglary and fire alarm monitoring—delivering maximum security and peace of mind through a direct connection to a certified Central Monitoring Station (CMS) integrated with Public Security (911) to ensure immediate response.

### Key Features:

- Comprehensive protection against burglary, fire, and intrusion/assault incidents.
- Installation of all device types: We deploy wired and wireless alarm systems through manufacturer-certified agencies..
- Fire alarm monitoring & direct integration with the Civil Defense and Public Security command & control rooms—ensuring the highest safety level in accordance with the Jordanian Building Code and approved safety requirements.
- Accurate reporting & notifications: Real-time alerts for unusual activity and technical faults, with tracking of opening/closing times, arming, and disarming events for security systems.
- Instant alerts via direct phone calls, email, and SMS.
- Direct integration with Public Security: Immediate linkage to command & control operations rooms to dispatch alarms to active security patrols in the field.
- Reliable service: A qualified team and an operational infrastructure supported by backup stations and independent power connectivity.

## (SMART GUARD)

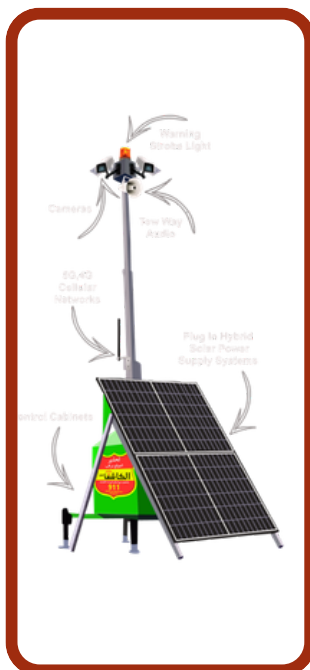

A fully integrated, AI-powered smart video monitoring solution that tracks your sites in real-time. Events are recorded and analyzed instantly to ensure maximum protection and rapid response.

### Smart Guard Services:

- Standards-based system deployment: Installation of surveillance systems in line with top international standards, using the latest AI technologies.
- Remote live video monitoring: Live streaming with immediate event analysis.
- Visual alarm verification: Confirms alarms visually to reduce false alarms and improve response accuracy.
- Employee monitoring & performance tracking: Daily management reports on violations or unusual activity.
- On-demand incident review: Immediate access to the camera system upon request to review events and determine root causes.

### Key Features:

- 24/7 continuous monitoring to ensure protection year-round.
- Cost reduction: Efficiently monitor multiple sites at a lower cost than traditional guard services.
- Effective deterrence against theft and vandalism through visual oversight and real-time recording.
- Live voice deterrence via loudspeakers: Human voice announcements to warn off intruders and prevent incidents before they occur.
- Secure backup storage for recordings and data, kept off-site to protect against fire, theft, tampering, or loss.

## (SMART LOCK)

An exclusive Al Kashef Al Saree' service for controlling the opening and locking of cash safes (cash and jewelry) using a One-Time Password/Passcode (OTP). This delivers a high level of security with flexible, controlled access.

### Smart Lock Services:

- One-time access codes: Open/lock safes using single-use codes with a defined validity window to minimize risk.
- 24/7 control center: Around-the-clock issuance of access codes and documented verification of safe locking.
- Secure code delivery: Codes sent quickly and securely via SMS, email, or WhatsApp.
- Audit-ready reporting: Dedicated reports that log every opening/locking event and identify authorized users.

### Key Features:

- Enhanced security: Dynamic, one-time codes only, with a complete usage audit trail.
- Verified secure locking: No action is finalized until the Control Center confirms the safe is properly locked.
- 24/7 monitoring: Continuous oversight, all day, every day, year-round.
- Free installation & warranty: Free installation with adjustments included during the warranty period.
- Global-grade quality: Certified locks compliant with international standards.
- Ongoing support & maintenance: Continuous technical support to ensure reliable performance and sustained security.

## (SMART PATROL GUARD)

A smart guard-tour tracking system that documents checkpoint compliance and sends instant alerts if a guard is late, stops unexpectedly, or experiences a fall.

### Why Smart Patrol Guard?

- Prevents tampering with guard tour reports and flags any negligence immediately.
- Reliable tour tracking both on-site and off-site.
- Smart checkpoints (QR / RFID / NFC) via a tour device or a mobile app.
- GPS tracking with fall/stop detection and immediate alarm notifications.

### What You Get:

- Live dashboard + electronic reports documenting every tour.
- An audit-ready record for investigations and complaint handling.
- Instant alerts for delays, skipped checkpoints, or emergency button activations.

### Best Fit For:

Security guarding companies, banks and exchange houses, jewelry and gold shops, malls, warehouses and logistics, factories and industrial parks, construction projects, farms, and resorts.

## (FIRE ALARM & FIREFIGHTING SYSTEMS)

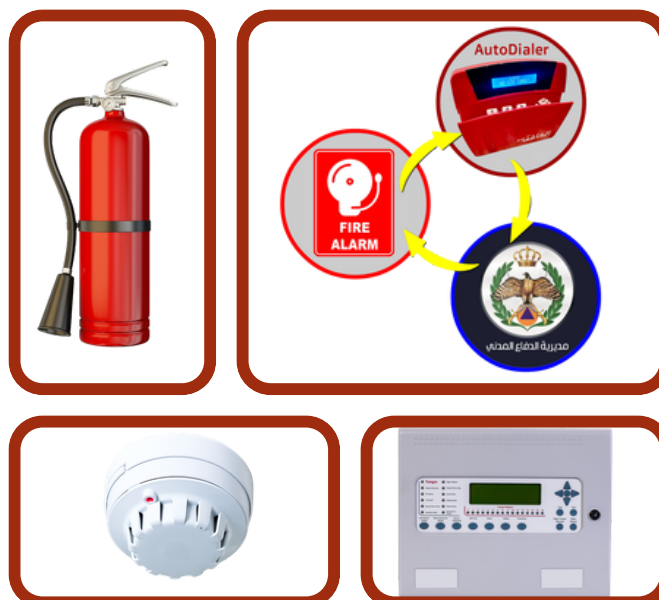

A comprehensive service focused on preventing fire risks and protecting lives and property—through the design, implementation, and operation of fire alarm and fire suppression systems built to top international standards and aligned with Fire Prevention Code requirements, Jordanian Building Codes, and Civil Defense regulations.

### Our Services:

- Detection system deployment: Installation and operation of smoke, heat, and gas detection systems using the latest internationally certified technologies.
- Direct CMS connection: Real-time linkage to Al Kashef Al Saree' Central Monitoring Station (CMS) to ensure fast response and continuous incident tracking.
- Suppression systems: Installation and operation of fire suppression solutions (fire extinguishers, fire hose systems, and automatic suppression systems) to deliver full site protection.
- 911 integration via Auto Dialer: Direct connection to the 911 Command & Control Center to ensure alarms are delivered immediately to the relevant authorities.
- Instant notifications: Real-time alerts via SMS and email upon detection of any risk.
- Preventive maintenance: Scheduled servicing and routine inspections to keep systems fully operational and improve reliability.

### Key Advantages:

- Rapid, effective response upon detection of smoke, heat, or gas.
- Full compliance with Fire Prevention Code requirements, Jordanian Building Codes, and Civil Defense standards.
- End-to-end protection through early warning systems integrated with both manual and automatic suppression.
- High reliability thanks to direct integration with the CMS and Public Security (911).

## (CENTRAL MONITORING STATION DESIGN)

A turnkey service covering the design, supply, and deployment of Central Monitoring Stations (CMS) to top international standards—built for seamless integration across all security and surveillance systems.

### **Our Services:**

- CMS design & implementation: Build central monitoring stations capable of managing intrusion alarms, fire systems, burglary/theft protection, and CCTV with high efficiency.
- Unified platform integration: Connect multiple subsystems into one platform for real-time control and monitoring.
- Smart automation workflows: Deploy intelligent automation to trigger alerts and immediate deterrence actions.
- Redundancy & fail-safe continuity: Implement redundant paths and failover to maximize uptime and ensure secure continuity
- Real-time & scheduled analytics: Produce instant and periodic analytical reports to support operational, administrative, and security decision-making.

### **CMS Key Features:**

- Open platform architecture: Supports thousands of devices and brands for maximum flexibility and easy integration.
- Highly scalable: From small monitoring rooms to mega-scale projects—without constraints on the number of cameras or devices.
- Advanced video control: PTZ control, interactive mapping, and multi-screen integration (Video Wall).
- AI video analytics: Suspicious object detection, smart search, license plate recognition (LPR), and motion tracking.
- Cloud streaming & backup: Cloud-based streaming and backup with Failover capabilities for high availability.
- User-friendly interface: Intuitive UI with digital maps and integration with other systems via API and web services.

## (ACCESS CONTROL SYSTEMS)

Deployment of advanced access control solutions to manage and secure entry to sensitive areas—enabling precise permission settings for entry/exit and full audit logging of all movements.

## (SELF-MONITORING INTRUSION ALARM SYSTEMS)

Smart alarm systems that operate via a SIM card or an internet connection—allowing users to receive real-time alerts and notifications instantly through their mobile phone or via email.

## (CCTV SYSTEMS)

High-quality CCTV deployment: Installation of premium surveillance cameras and closed-circuit television (CCTV) systems to strengthen site security.

On-demand monitoring & playback: Reliable systems for reviewing recordings and monitoring activity whenever needed.

## (MAINTENANCE & TECHNICAL SUPPORT)

Full-service maintenance for all security and alarm systems.

Flexible maintenance contracts (monthly, semi-annual, or annual) to match different customer needs.

Scheduled updates and rapid repairs to ensure optimal performance.

24/7 specialized technical support team to keep operations running without interruption.
